

Developmental or Neurological Ankle Valgus

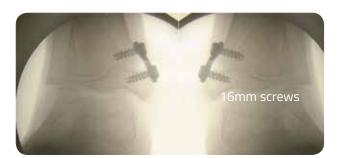

Case study provided by Peter M. Stevens, M.D., University of Utah

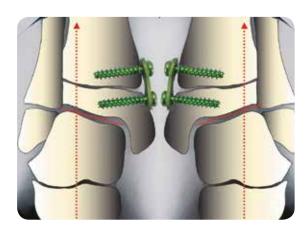

- Conditions Including:
- Cerebral Palsy
- Spina Bifida
- Down's Syndrome
- Multiple Epiphyseal Dysplasia
- Congenital Clubfoot
- Ball & Socket Ankle

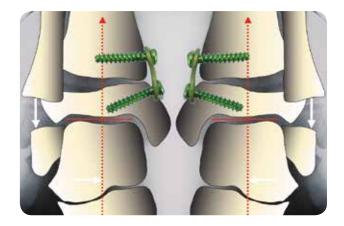

6 yrs. after Posteromedial Release for TEV

12mm plates with 16mm screws

Diverging screws function like a hinge, avoiding physis compression.

Operative Brief

 Insert K-wire in physis and verify position with fluoroscope.

2. Apply conformed eight-Plate over K-wire.

3. Insert two K-wires: one into the epiphysis and one in the metaphysis.

4. Drill only to 5mm depth with the 3.2mm cannulated drill bit and insert 16mm or 24mm eight-Plate Guided Growth Screws.

Operative brief and case studies provided by Peter M. Stevens, M.D., University of Utah
