

TrueLok™

Ring Fixation System

Achieve Precise Alignment

TrueLok™ Phantom Hinge

Designed to maintain:

- Axis of rotation during joint contracture correction
- Joint mobility in arthrodiasis procedures

The Phantom Hinge represents the latest addition to the TrueLok™ Portfolio by providing a stabilizing constrained hinge solution when using circular fixation – whether in cases of trauma or elective deformity surgery.

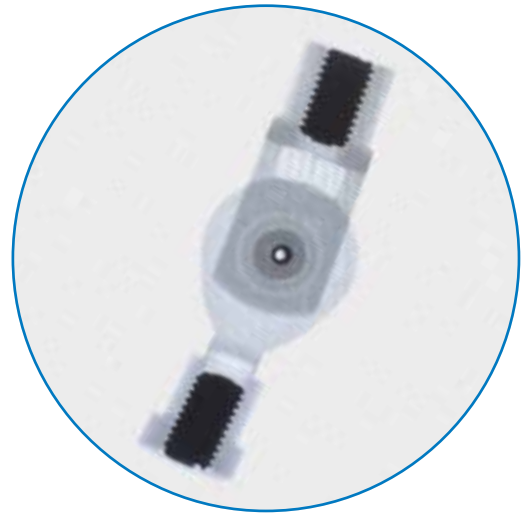

Radiolucency

The radiolucent material allows for clear monitoring of joint congruence during correction.

Quick and Easy

The Phantom Hinge is a single-use, sterile component that can be quickly and easily added to a TrueLok™ device.

Two Size Offerings

ANKLE HINGE

The smaller size Phantom Hinge is specifically designed for use with the ankle frame.

Cannulation allows to precisely align with reference wire.

KNEE HINGE

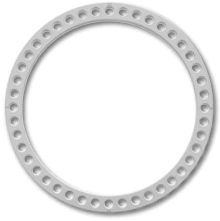

The larger size Phantom Hinge is specifically designed for use with the knee-spanning frame.

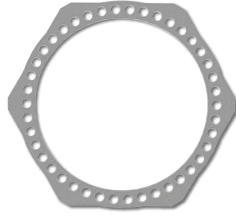

TrueLok™ Phantom Hinges

Part #	Description	Notes
99-50-2201M	TL PHANTOM HINGE KNEE PACK OF 2	STERILE, 2 PIECES PER PACK
