

TrueLok™ EVO

Ring Fixation System
Sterile Kit Brochure

MITIGATE RISK OF SURGICAL SITE INFECTION (SSI)*

55%

of defects (< 2 mm) in sterilized tray
wraps go undetected, potentially increasing
the risk of contamination

MINIMIZE OPERATING ROOM DELAYS**

\$1,081

Average cost to a facility for operating room
delays related to tray contamination
and restocking issues

**Why waste
time and money
when you
don't have to?**

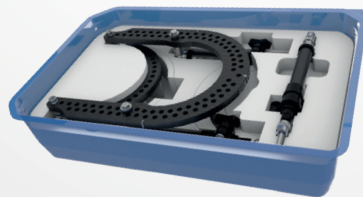

Benefits of
TrueLok™ EVO sterile,
preassembled ring fixators

IMMEDIATE OFF-THE-SHELF AVAILABILITY

139 minutes

Average time required for
sterile processing of a tray,
potentially impacting surgical
workflow efficiency

Open the kit

When urgent indications call for immediate solutions, why leave anything to chance?

Particularly in trauma and complex limb reconstruction scenarios, where time, sterility, and procedural efficiency are critical.

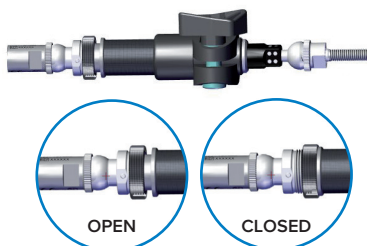

These advantages become particularly relevant in clinical scenarios requiring rapid decision-making and optimized workflow efficiency.

Additional features and benefits include:

Carbon fiber,
radiolucent components

Built-in
dynamizers

MR
Conditional
